### STRUCTURAL SPECIFICATIONS

- All walls, bracing, and brackets are made of 3/16" grade steel plate
- Deadbolts and safety pins are stainless steel
- All metal is powder coated
- Door has been tested at Texas Tech Wind and Science Institute

### INSTALLATION REQUIREMENTS

- Clearance to your shelter location required. Our knuckle boom truck is approx. 14 ft. tall
- Homeowner is responsible for checking if a building permit is required to install your above ground storm shelter. If required, homeowner is responsible for obtaining the correct permit
- Most municipalities require shelters to be 5 ft. from property lines; verify your distance required
- Do not place shelters over underground utility lines, underneath hanging utility lines, or in areas prone to flooding
- Put in a location that will be quickly and easily accessible
