FEATURES & STRUCTURAL SPECIFICATIONS OF COMMUNITY STEEL SAFE ROOMS

- **Ventilation:** Provided via multiple 4" or 6" vents depending on shelter size and specification
- **Door:**
 - Two points of entry required for all community storm shelters with wheelchair-accessible vault doors and three-point locks
 - Our shelters come with two 36" doors that are manufactured from two sheets of steel
 - Outer skin is 3/16" and the inner skin is 12-gauge with "Z" bracing and has three (3) deadbolt locks for maximum strength and security
- **Color:** Entire unit is primer painted
- **Base:** Shelter is secured to concrete pad using special Hilti anchors
- **Warranty:** 10-year warranty on all models

ACCESSORIES

- One portable chemical toilet
- One flashlight per 10 occupants
- One class ABC fire extinguisher installed on an interior wall
- Label denoting compliance with ICC-500
- Sign directing occupants to the shelter placed on the exterior of entry doors (including braille)

TESTING SPECIFICATIONS

- Designed in accordance of FEMA 361 and ICC 500 standards
- Impact testing completed by Texas Tech Wind Research Center
